SYSTEMS & CONTROL LETTERS

Author Index Volume 32 (1997)

(The issue number is given in front of page numbers)

Antoulas, A.C., System and Control Theory in the Behavioural Framework (*Editorial*) (5) 247–248
Astolfi, A. and **W. Schaufelberger,** State and output feedback stabilization of multiple chained systems with discontinuous control (1) 49– 56

Bai, E.-W., R. Tempo and **K. Nagpal,** Recursive system identification in the presence of noise and model uncertainties (1) 57– 62
Bortoff, S.A., see A.F. Lynch (3) 161–172

Caines, P.E., V. Gupta and **G. Shen,** The hierarchical control of *ST*-finite-state machines (4) 185–192
Chanane, B., A new functional expansion for nonlinear systems (2) 91– 98
Chen, B.M., Exact computation of infimum for a class of continuous-time H_∞ optimal control problem with a nonzero direct feedthrough term from the disturbance input to the controlled output (2) 99–109
Czornik, A. and **A. Nawrat,** On upper bounds for the unified algebraic Riccati equation (4) 235–239

D'Andrea, R., $\mathscr{H}_\infty$ optimal interconnections (5) 313–322
de Jager, B., see S. Weiland (5) 323–334
Deng, H. and **M. Krstić,** Stochastic nonlinear stabilization – I: A backstepping design (3) 143–150
Deng, H. and **M. Krstić,** Stochastic nonlinear stabilization – II: Inverse optimality (3) 151–159

Elliott, R.J. and **J.B. Moore,** Almost sure parameter estimation and convergence rates for hidden Markov models (4) 203–207

Fagnani, F. and **J.C. Willems,** Deterministic Kalman filtering in a behavioral framework (5) 301–312
Fagnani, F. and **S. Zampieri,** Canonical kernel representations for behaviors over finite Abelian groups (5) 271–282
Ferreres, G. and **V. Fromion,** Computation of the robustness margin with the skewed μ tool (4) 193–202
Feuer, A., see G.C. Goodwin (3) 173–177
Fromion, V., see G. Ferreres (4) 193–202

Georgiou, T.T., M. Khammash and **A. Megretski,** On a large-gain theorem (4) 231–234
Gómez, G.I., see G.C. Goodwin (3) 173–177
Goodwin, G.C., A. Feuer and **G.I. Gómez,** A state-space technique for the evaluation of diagonalizing compensators (3) 173–177
Gu, D.-W., see A.-W.A. Saif (2) 111–120
Guardabassi, G.O. and **S.M. Savaresi,** Approximate feedback linearization of discrete-time nonlinear systems using virtual input direct design (2) 63– 74
Gupta, V., see P.E. Caines (4) 185–192

Heij, C., see W. Scherrer (5) 335–344

Khammash, M., see T.T. Georgiou (4) 231–234
Krstić, M., see H. Deng (3) 143–150
Krstić, M., see H. Deng (3) 151–159

Leonard, N.E., Stabilization of underwater vehicle dynamics with symmetry-breaking potentials (1) 35– 42
Lim, A.E.B. and **J.B. Moore,** A quasi-separation theorem for LQG optimal control with IQ constraints (1) 21– 33
Liu, K.-Z., H. Zhang and **T. Mita,** Solution to nonsingular $\mathscr{H}_2$ optimal control problem with unstable weights (1) 1– 10
Lu, X.-Y. and **S.K. Spurgeon,** Robust sliding mode control of uncertain nonlinear systems (2) 75– 90
Lynch, A.F. and **S.A. Bortoff,** Non-linear observer design by approximate error linearization (3) 161–172

M'Closkey, R.T., An averaging theorem for time-periodic degree zero homogeneous differential equations (3) 179–183
Magni, L. and **R. Sepulchre,** Stability margins of nonlinear receding-horizon control via inverse optimality (4) 241–245
Mazenc, F., Stabilization of feedforward systems approximated by a non-linear chain of integrators (4) 223–230
Megretski, A., see T.T. Georgiou (4) 231–234
Meier, J., see G. Zimmer (1) 43– 48
Mita, T., see K.-Z. Liu (1) 1– 10
Moore, J.B., see A.E.B. Lim (1) 21– 33
Moore, J.B., see R.J. Elliott (4) 203–207

Elsevier Science B.V.

Nagpal, K., see E.-W. Bai (1) 57– 62
Nawrat, A., see A. Czornik (4) 235–239

Oishi, Y., A bound of conservativeness in sampled-data robust stabilization and its dependence on sampling periods (1) 11– 19

Polderman, J.W., Proper elimination of latent variables (5) 261–269
Postlethwaite, I., see A.-W.A. Saif (2) 111–120

Rangan, S., Multiobjective $\mathscr{H}_\infty$ problems: Linear and nonlinear control (3) 135–141
Rapisarda, P. and **J.C. Willems**, The subspace Nevanlinna interpolation problem and the most powerful unfalsified model (5) 291–300

Saif, A.-W.A., D.-W. Gu and **I. Postlethwaite**, Strong stabilization of MIMO systems via $\mathscr{H}_\infty$ optimization (2) 111–120
Savaresi, S.M., see G.O. Guardabassi (2) 63– 74
Schaufelberger, W., see A. Astolfi (1) 49– 56
Scherrer, W. and **C. Heij**, Identification of factor models by behavioural and subspace methods (5) 335–344
Sepulchre, R., see L. Magni (4) 241–245
Shen, G., see P.E. Caines (4) 185–192
Spurgeon, S.K., see X.-Y. Lu (2) 75– 90
Stoorvogel, A.A., see S. Weiland (5) 323–334

Tempo, R., see E.-W. Bai (1) 57– 62
Trentelman, H.L. and **J.C. Willems**, Every storage function is a state function (5) 249–259
Trentelman, H., see R. van der Geest (5) 283–290

van der Geest, R. and **H. Trentelman**, The Kalman–Yakubovich–Popov Lemma in a behavioural framework (5) 283–290

Weiland, S., A.A. Stoorvogel and **B. de Jager**, A behavioral approach to the $\mathscr{H}_\infty$ optimal control problem (5) 323–334
Willems, J.C., see H.L. Trentelman (5) 249–259
Willems, J.C., see P. Rapisarda (5) 291–300
Willems, J.C., see F. Fagnani (5) 301–312

Zampieri, S., see F. Fagnani (5) 271–282
Zhang, C. and **J. Zhang**, H_2 performance of continuous time periodically time varying controllers (4) 209–221
Zhang, H., see K.-Z. Liu (1) 1– 10
Zhang, J., see C. Zhang (4) 209–221
Zhou, T., Model uncertainty in frequency response based system identification (3) 121–133
Zimmer, G. and **J. Meier**, On observing nonlinear descriptor systems (1) 43– 48
